Summary

Senior Computer Science student at the University of Louisiana Monroe with hands-on experience in IT support, software development, and emerging technologies. Curious and adaptable by nature, with a passion for building applications, exploring AI, experimenting with new technologies, and solving real-world technical problems. Currently gaining on-site IT experience through roles at Tech Savvy LLC and ULM while continuously expanding my skills across software engineering and modern technology.

Education

University of Louisiana at Monroe

Aug 2023 - May 2027

Bachelor, Computer Science - Minor Computer Information System

- **GPA:** 3.78
- **Coursework:** Web Development, Data Structures and Algorithm, Database System(SQL), Object-Oriented Programming(Java), Artificial Intelligence, Information Security Management

Work Experience

Tech Savvy LLC

Feb 2026 - Present

IT Support Technician

West Monroe, LA, USA

- Provided on-site and remote technical support to end-users, leveraging ConnectWise as the primary ticketing system to log, track, and resolve IT incidents efficiently, ensuring timely issue resolution and a seamless support experience.
- Provided Tier 1/Tier 2 help desk support through troubleshooting and resolution of hardware, software, and network issues, including device setup and configuration, network installation, and user training and documentation to drive end-user productivity.

University of Louisiana at Monroe

Aug 2024 - Present

University IT Helpdesk

Monroe, LA, USA

- Supported customer service operations by resolving 500+ user support tickets related to authentication, networking, and enterprise systems, ensuring SLA adherence, effective troubleshooting, and clear professional communication.
- Collaborated with cross-functional IT and software teams to diagnose, debug, and escalate system issues, improving service reliability and user experience across enterprise applications.
- Assisted with process automation and system support scripting, improving operational efficiency and providing exposure to AI-informed service optimization and analytics.

District Administration Office

Oct 2022 - Jan 2023

Web Development Intern

Kathmandu, Nepal

- Assisted software development teams by designing and maintaining backend services using Node.js, SQL, and JavaScript, supporting secure data storage and retrieval for 1,500+ records per month.
- Applied relational database concepts, data validation, and quality checks to maintain data integrity, reducing errors by 20% and improving system reliability.
- Supported automation, reporting, and analytics workflows, preprocessing and transforming data to enhance retrieval efficiency by 15% and contribute to data-driven service improvements.

Projects

Job Pilot AI | NextJS, Shadcn UI | InsForge [Website Link](#)

- AI-powered job search platform designed to make job hunting easier and more efficient. It helps users discover relevant job opportunities, analyze company information, calculate job match scores, and track applications—all from one streamlined dashboard.

WellBite-Nutrition Recommender | ReactJS | PostgreSQL [Source Code](#)

- Led a team of 3 in a hackathon to architect a full-stack AI-powered meal planning prototype using React, Django, PostgreSQL, and Gemini API, generating allergy-aware recommendations from University cafeteria items with 95% accuracy in testing.

AI Agents Automation [Source Code](#)

- Developed agentic AI on n8n, leveraging Telegram Bot API and NLP-based workflow orchestration to automate user query resolution and email communication, streamlining manual tasks and enhancing operational efficiency.

Leadership

GDSC ULM

Aug 2025 - Present

External Vice President

- Partnered with technical teams and sponsors to support software development initiatives
- Managed project funding, ensuring successful delivery of campus tech programs

Technical Skills

- **Languages:** Python, Java, SQL, JavaScript
- **Developer Tools:** Excel, Figma, Postman, Git, Jira, ConnectWise, Microsoft 365
- **Libraries/Frameworks:** NodeJS, ReactJS, PostgreSQL, NextJS, MongoDB
- **Certifications:** AWS Certified AI Practitioner, AWS Certified Cloud Practitioner, Essential of Ethical Hacking
